Not enough content.. AO International Tennis. It's a tight game that's just lacking in greatness or spark. There is potential, despite issues. Still enjoyable if you like tennis, on the other hand it can also be very frustrating, the game had some good ideas but fell short on the execution.. A hesitant recommendation as it's the best tennis title we've got for that balance between arcade and simulation (as well as some licenses) and decent graphics on PC, and there are glimpses of a good title here, but it leaves a heck of a lot to be desired. If not for the constant updates, I would be very concerned. Proceed with caution.. This is the only tennis game since Top Spin 4 back in 2011, that puts an emphasis on simulation, rather than arcade action. It's far from perfect, but you have to cut the developers some well-earned slack, man. Tennis games are a risky business, the licenses are expensive and the sales figures are questionable. I, for one, am grateful that there finally is another tennis game with good controls, an ok gameplay and an in-depth character creator with career mode. Yeah, the graphics are a little bland and basically the same as TS4, but immersive enough to let you dive into the experience. Pros: + Decent controls + Detailed character editor + Australian Open fully licensed + Licensed players such as: Nadal, Isner, Goffin (ATP) or Kerber, Radwanska, Stosur (WTA) + Multiplayer Cons: - Aged graphics - Sometimes not-so-good character animations - Bland training mini-games (Career) Indecisive: o Missing licenses for French Open, Wimbledon and US Open (like I said before, licenses are expensive - I really can't consider that as a con) If you like tennis games, give this game a try. You might want to wait until it's on Sale, but don't pirate it.. Well, it's terrible. The mechanics were poorly cribbed from Top Spin and not executed very well. What Top Spin nailed was the tradeoff between a perfectly timed finesse shot (tapping at exactly the right time) and a well struck shot where you held the button down. Finesse shots, if timed perfectly, were super accurate and nearly the pace of a normal shot with perfect timing, or even more pace if flat. Maybe my starter character is too terrible for the subtlety of the mechanics in this game to be rewarding, or maybe the game is just terrible.. AO International Tennis was allegedly created to satisfy the needs of tennis fans all around the world who strive for a new, fresh tennis game, but it doesn't even get close to doing so. First off, the game has a lot of bugs and sudden crashes, every time you run it having to log into the Big Ant account, which is close to a must if you want to enjoy all game's features. Alongside numerous bugs, the gaming experience is at most satisfactory. Often, players make robotic moves and the shots become repetitive. Cut-out scenes skip time and they seem as you've skipped some scenes yourself before reaching them. Overall, the game is far too expensive for what it delivers: bad coding with lots of bugs, arcadish gameplay, laggy loading. It'd have potential to become a good to very good game if the developer would invest a tad more time in solving the bugs and lags, and also add more players (which seems unlikely at the point, bearing in mind that the developer barely meets most basic needs).. sexy ladies!. I just installed AO International Tennis and after i download some players from community and after i play one match in the career it shows me loading data error.. Good game to play!. The gameplay is okay in my opinion. The only other tennis game franchise I played a lot of us Virtua Tennis series. I did play others for PS2 back when but don't recall it but the gameplay compared to VT is enjoyable, takes getting used to but it's enjoyable. My gripe with this game is the models and surroundings of the court and crowd. The courts just look like bland flat color squares rather than clay, etc. Think of drawing a basic shape and filling it with one color in Paint, that's what it looks almost like to me. I'll return to it once they fix this. It detracts from a game with good game play.
